Introduction

The PSA, a group of "committed" individuals, is not content to rest on its laurels after an award-winning year of serving St. George PSY students. Last year, courageous volunteers maintained test libraries, provided graduate school information and dispensed valuable advice from our Sid Smith base of operations. These hard-working souls were even occasionally seen outside the building, particularly during PSA events such as Wine & Cheese socials, BBQs, Bake Sales, and the Dr. Freud Competition. Along with all these activities, we have lots of new ideas for the upcoming year, so come check us out! Visit the Bat-Cave at Sid Smith 509 (ground floor), give us a call (416-978-6762) or check out our website (<http://www.psych.utoronto.ca/~psa>) for all the latest PSA news and information.

Students generally agreed the size of the class was an immense barrier to delivery quality of lectures, but Wall well-surpassed their expectations. His lectures were informative, humorous, and thought-provoking. The website and online tutorials helped students better grasp the minute details of the material and Wall was more than forthcoming in offering his time to help students outside of class. The only criticism made by an overwhelming majority were the tests. The multiple-choice format was overly specific and basically required regurgitation of minute details from within the material and did not properly reflect students' grasp of knowledge.

Goldberg was considered to be enthusiastic and humorous but his lectures were highly unorganized and were not aligned with the text readings. His tests were a little too easy but students appreciated the chance to apply course material to every day life problems on tests. Students enjoyed Goldberg's use of videos and interactive assignments.

PSY 230H1S Personality and Its Transformations

Learn Exp	0	0	1	11	17	15	53	6.1

Comments such as "outstanding professor" and "a profound learning experience" were typical responses to this course. Many students enjoyed Peterson's lecture style, as well as his knowledge and enthusiasm. However, some students found that the lectures lacked structure. As well, many felt that there was too much reading for this course, especially since it was a half-year class.

PSY 240H1F Introduction to Abnormal Psychology

Difficulty	0	0	3	62	29	3	0	4.3
Learn Exp	0	0	0	16	25	31	27	5.7

McFarlene was a very good instructor who gave extremely interesting and enjoyable lectures. She was enthusiastic, organized, communicated clearly and students liked her teaching style. Specifically, the talks about her own experience and real life examples, as well as the video presentations were very helpful. Students also appreciated the bonus assignments and the fact that the lecture slides were made available before each class.

The multiple choice questions on the tests were said to be way too detailed and specific, and the second test was too long. There were a few complaints about the textbook and the large amount of reading.

Students appreciated Rector's clarity and organization, however, the lectures were said to follow the textbook too closely. The 2nd term test was criticized for the level of detail, and didn't truly evaluate students' knowledge.

Videos and guest speakers added variety that students enjoyed.

PSY 260H1F Introduction to Learning

Most students did not enjoy the course, with a number of students saying that the content and the textbook were both dull. Many students also thought that the 5% participation mark was useless for a class that large. While most students thought that Ramos used good examples in class, was enthusiastic, and her attempts at humour was appreciated, a few students thought that she was disorganized.

Learn Exp	0	0	1	18	30	33	14	5.4

McDonald was found to be a clear, concise, and very organized lecturer. This was deemed very helpful by the students, especially since the course content was challenging. Students also liked the fact that McDonald posted the lecture slides before class.

A few students criticized the tests, particularly the written questions, which tested only memorization skills and not a deeper understanding of the material.

Overall, this was a course worth taking.

PSY 330H1S History of Psychology

Peterson received many compliments on his lectures, as well as his knowledge and passion for the material. Students found the course to be interesting, inspiring, and personally relevant to their own lives. In fact, more than one student recommended that everyone, including non-psychology students should take this course.

A few people found the classes to be somewhat repetitive, especially during the lectures that were being filmed. The assigned readings were also seen by some as being too lengthy and difficult. Overall, students really enjoyed this course.

Yeomans was an enthusiastic and knowledgeable lecturer. Although his rapid speech made it an intense lecture, students appreciated Yeomans' interest and approachability. The only criticism was the method of evaluation used which consisted of essay testing without choice and severely restricted time allotments. Students enjoyed the course and found the material highly valuable. Although the time slot of lectures made it a struggle to get to class, for many it was well worth the effort.

Learn Exp	0	0	0	9	27	45	18	5.7	

Students felt Bagby's enthusiasm and knowledge made the class enjoyable and a positive learning experience. However, students did not appreciate the assignments due so close together and relatively little feedback was offered on returned assignments. Overall, the lecturer was great and the material was valuable.

PSY 460H1S Learning Seminar
