| Learn Exp | 3 | 0 | 9 | 48 | 19 | 12 | 6 | 4.5 |  |

Most students commended Kergin for his ability to explain course material in a thorough and well-organized manner, and at a suitable pace. A few students felt more examples (as opposed to derivation and explanation of theory) would have been useful.

## APM 236H1S Applications of Linear Programming

Instructor(s): S. Homayouni

| Enr: 51 | Resp: 26 |  |  |  | Retake: 45\% |  |  |  |

| Learn Exp | 0 | 6 | 0 | 46 | 40 | 6 | 0 | 4.4 |

Despite computational errors, the lectures were generally well-presented and clear. The lecturer was very approachable outside of class. Some students complained that the tests were much harder than the material taught in lectures. More examples should have been discussed in class.

APM 346H1F Differential Equations
Instructor(s): V. Jurdjevic
Enr: 66
Resp: 41
Retake: 67\%

| Learn Exp | 0 | 0 | 3 | 34 | 24 | 24 | 13 | 5.1 |

Jurdjevic was said to be very dedicated and knowledgeable, but somewhat disorganized. Most enjoyed his lecturing style, describing him as enthusiastic and inspiring, entertaining enough to make students consistently attend 9 a.m. classes. The one major complaint was that not enough examples were provided/completed in class. Outside of lecture, the instructor was said to be kind, courteous, and helpful. Students did criticize the book as well as minimal feedback with regards to marking. Posting problem sets and marks online was also suggested.

## APM 351Y1Y Partial Differential Equations

Instructor(s): G. Forni
Enr: 25 Resp: 14 Retake: 54\%

| Learn Exp | 0 | 12 | 0 | 37 | 37 | 0 | 12 | 4.5 |

Forni was said to be a hard working instructor, "who tried to communicate in great detail". Tests were though to be challenging, and the text was not considered helpful.

## APM 421H1F Mathematical Foundations of Quantum

Instructor(s): R. Jerrard

| Learn Exp | 0 | 14 | 0 | 14 | 28 | 14 | 28 | 5.1 |

Students praised McCann as a good instructor, noting his knowledge and his lecturing skills. There was a concern, however, about the difficulty of the material and the heavy workload.

## APM 461H1S Combinatorial Methods

Instructor(s): S. Tanny

| Enr: 26 | Resp: 17 |  |  |  |  | Retake: $93 \%$ |  |  |

| Learn Exp | 0 | 7 | 14 | 42 | 35 | 0 | 0 | 4.1 |

While most appreciated Derzko's instruction and careful explanations, a few found his lectures somewhat disorganized and lacking in examples. The assignments should have been shorter and more reflective of the test content.

## APM 466H1S Mathematical Theory of Finance

Instructor(s): L. Seco

| Enr: 47 | Resp: 18 |  |  |  |  | Retake: 87\% |  |  |

Seco was felt to be knowledgeable and enthusiastic, teaching a useful and interesting course

MAT 123H1S Calculus and Linear Algebra for Commerce (A)
Instructor(s): P. Kergin

| Learn Exp | 7 | 15 | 0 | 38 | 15 | 7 | 15 | 4.2 |

Most students described Kergin as very clear and concise, but a few stated that his lectures were unorganized and his notes long and wordy. Some expressed concerns regarding the test marking scheme as well as time for individual consultation.

## MAT 125H1S Calculus I (A)

Instructor(s): A. Lam

| Enr: 65 | Resp: 31 |  |  |  | Retake: $55 \%$ |  |  |  |

| Learn Exp | 0 | 0 | 0 | 25 | 20 | 25 | 30 | 5.6 |

Lam received outstanding reviews. He was said to be kind, humourous, friendly, enthusiastic, and eager to help students, while communicating concepts well and giving detailed examples for clarity. Tests were said to accurately reflect the content of the lectures. While Lam was often identified as "the most exemplary" math lecturer at UofT, common criticisms included concerns that sometimes he spoke too quickly.
[ED Note: A. Lam received ASSU's Ranjini Ghosh Award for Excellence in Teaching for 2005-06]

MAT 133Y1Y Calculus and Linear Algebra for Commerce Instructor(s): J. Tate
Enr: 125 Resp: 66 Retake: 51\%

| Learn Exp | 6 | 0 | 4 | 23 | 29 | 23 | 12 | 4.9 |

Tate was said to be an exemplary instructor. She was praised for her organization, clarity and thoroughness as well as her enthusiasm and dedicated efforts to help students learn and comprehend the material.

An insightful course, though many would have liked lectures to have been spread out over a week rather than scheduled in 3-hour blocks.

Instructor(s): R. Saghin

| Enr: 87 | Resp: 17 |  |  |  |  | Retake: 57\% |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |

| Learn Exp | 0 | 7 | 7 | 50 | 21 | 14 | 0 | 4.3 |

While students noted Saghin's preparedness and efforts in lecture, some felt that he gave unclear explanations and did not answer students' questions effectively.

Evaluations for the course (not written by this instructor, but common across lecture sections) were said to be unfair as they did not adequately represent the course material.

Instructor(s): A. Igelfeld

| Enr: 130 | Resp: 24 |  |  |  |  |  | Retake: $45 \%$ |  |  |

| Learn Exp | 5 | 5 | 5 | 40 | 20 | 20 | 5 | 4.4 |  |

Igelfeld was described as knowledgeable, but "lacking in his explanation and presentation skills." Some felt that he spent discrepant proportions of time on particular topics. Also they expressed a need for the lecture organization to be consistent with respect to that of the text. While Igelfeld gave difficult examples in class, these were said to be of great use in preparing for difficult tests. Tutorials were considered ineffective.

Instructor(s): J. Tate

| Enr: 137 | Resp: 66 |  |  |  |  | Retake: 49\% |  |  |

| Learn Exp | 3 | 5 | 1 | 20 | 25 | 25 | 16 | 5.0 |

Students were divided in their evaluation of the course and instructor. Some said Tate was effective and explained the material clearly with the use of many examples, while a few thought she was confusing because of some errors she made. The course was enjoyable despite very difficult tests, that were designed by a different instructor. The multiple choice based tests, with each question worth $4 \%$, were not positively viewed and deemed unfair.

| Learn Exp | 3 | 7 | 11 | 40 | 11 | 14 | 11 | 4.4 |

Kergin was described at times as "absolutely brilliant", but many felt his "teaching style did not reflect his knowledge on the subject". Although he was said to be considerate and eager to help students, his explanations were considered, at times, unclear and confusing. Some students suggested giving more examples in class and being slightly more interactive. A specific tutorial agenda was requested, as the course had several sections.

Igelfeld was said to be very knowledgeable, though students had differing opinions regarding his ability to communicate concepts effectively. Many commended Igelfeld for his enthusiasm and approachability. Inclass examples and tests were said to be difficult.

## MAT 135Y1Y Calculus I

| Learn Exp | 0 | 0 | 5 | 37 | 29 | 16 | 10 | 4.9 |

Students felt LeBlanc was a superb instructor. He always arrived with "structured and well-prepared" notes and was described as friendly and
encouraging. Students praised him for his enthusiasm and impressive clarity, which made math enjoyable despite the lectures being each 3 hours long.

Instructor(s): G-V. Nguyen-Chu

| Enr: 166 | Resp: 17 |  |  |  |  | Retake: 64\% |  |  |

| Learn Exp | 0 | 0 | 8 | 66 | 16 | 0 | 8 | 4.3 |

Students were generally satisfied with Nguyen-Chu's performance as an instructor. Some were appreciative of his course notes, which they found to be clear and well-organized, while others lauded him for what the considered a significant improvement in teaching skills as the term progressed. There was some concern, however, about the weight given to multiple-choice evaluations.

Most students felt LeBlanc was a good instructor, and praised him for his well-organized lectures and notes. He was also commended for his "use of appropriate and progressively harder examples" to communicate concepts with clarity. The students felt LeBlanc answered questions adequately and explicitly, and was also available for individual consultation. His sense of humour was appreciated, as the course was scheduled for a 3-hour block of time. A few felt LeBlanc could have spoken a bit louder, but in all other respects, he was very well-liked.

Most students commended the instructor for lecturing in an organized and timely manner. Many felt he was "effective in his choice of examples," eager to help the students, and patient in addressing their questions. His clarity made lectures a good review for tests, and his office hours were a big help for students as well. Tutorials were valued by most, with many asking that they be longer to allow for better test preparation.

Students unanimously praised Savage for being enthusiastic, approachable, and well-organized. He was said to "elucidate concepts clearly with plenty of examples" and lectures were described as "very interactive and intellectually engaging". Many students complained about the course's heavy workload as well as the 3-hour lecture, but felt that Savage addressed their needs and concerns well. His extra review sessions were also greatly appreciated.

Tutorials for this course were deemed ineffective.

Most students gave Uppal good reviews. His classes were wellorganized, well-paced, and he explained concepts clearly. His sense of humour and sarcasm also made lectures enjoyable.
While the course was considered useful, there were many complaints regarding the lack of examples (over theory), the "large gap between standards of the quizzes and the midterm", as well as a "draconian style of evaluation" which included multiple choice questions of significant weight (and hence few/no part marks).

A re-organization of presented topics was also suggested.

Cohen's notes were organized he explained concepts and answers well. Students felt he was also very friendly and approachable, stating that he was "always available for consultation and overall a pleasant individual". The text was not considered very helpful. Many students also expressed concern with regard to the midterm - it was said to be overwhelmingly difficult an they felt that the assignments had not prepared them well for it. Most found that Cohen was too focussed on concepts and theoretical approaches would have liked to see additional examples from outside the textbook to show applications of theorems. [More geometric interpretation would have been appreciated and contributed to a balance between application and theory.] A full solution manual was also suggested.

Cohen presented lectures clearly and with humour. Students emphasized that he was willing to present mathematics beyond the course material if asked, but a few felt that not enough time was left for material on the syllabus. The textbook was described as more appropriate for a higher-level course by several students.

Overall, however, an interesting course, taught by a very good instructor.

## MAT 240H1S Algebra I

Instructor(s): F. Murnaghan

| Enr: 64 | Resp: 23 |  |  |  | Retake: 75\% |  |  |  |

| Workload | 0 | 0 | 0 | 34 | 30 | 30 | 4 | 5.0 |

Murnaghan was well-prepared, explained concepts thoroughly and concisely, and made ample use of examples. However, a few considered her lectures a little disorganized at times. She was also felt to be very approachable in assisting students.

## MAT 244H1F Introduction to Ordinary Differential Equations

Instructor(s): B. Khesin

| Learn Exp | 0 | 0 | 2 | 48 | 25 | 12 | 10 | 4.8 |

Many students criticized the evaluation methods and marking scheme for this course. In particular, the felt that not enough time had been allotted to tests and that the penalties for computational (as opposed to theoretical) errors were too harsh.

Despite this, most students liked Khesin's lectures. He was said to be well-organized and clear in communicating concepts.

MAT 246Y1Y Concepts in Abstract Mathematics

| Learn Exp | 0 | 0 | 3 | 20 | 24 | 44 | 6 | 5.3 |

Rosenthal was described as an enthusiastic, clear, entertaining lecturer. Many students were impressed that he could answer questions without hesitation, although this made one student uncomfortable. Students clamored for a course textbook as well as more practice questions for the heavily weighted exam. Some complained that the scope of the material was too broad at the expense of thoroughness.

A number of students described Korman as the "best instructor" they have encountered. Most students were impressed by his willingness to help and his approachability, with many mentioning extended and extra office hours. The course material was said to be difficult, however, most students enjoyed the course.

## MAT 247H1F Algebra II

| Learn Exp | 0 | 0 | 0 | 20 | 33 | 29 | 16 | 5.4 |

Murnaghan was found to be a good teacher, delivering enthusiastic, clear lectures with good use of examples. Some students mentioned that Murnaghan spoke quickly and softly, but that this was not problematic. Others were concerned that the two-hour lectures were too long, and that some proof outlines were described orally and not written on the board.

## MAT 301H1F Groups and Symmetries

Instructor(s): H. Kim

| Learn Exp | 0 | 0 | 0 | 23 | 42 | 33 | 0 | 5.1 |

Most students found Stanczak to be a good teacher, who made the class "a pleasure to take". Some students required more time for the midterm, while others found the assignments challenging, but Stanczak did care for his students. His use of examples was especially helpful.

## MAT 309H1F Introduction to Mathematical Logic

Instructor(s): F. Tall

| Enr: 33 | Resp: 19 |  |  |  | Retake: 55\% |  |  |  |

| Learn Exp | 6 | 0 | 6 | 43 | 18 | 12 | 12 | 4.6 |

Students felt that the instructor was very knowledgeable about the subject. Some expressed concerns regarding the evaluation methods (harsh marking and test content and length), organization, and consistency with the textbook. Tall was said to occasionally deviate from course material, as well as assume non-prerequisite material, but was also described as having good interaction with his students.

MAT 315H1S Introduction to Number Theory

Most students said he emphasized his knowledge, enthusiasm and approachability, while some criticized him for his lack of organization and repetitiveness due to underestimating students' comprehension of the material. Expectations of the course were also said to be a little unclear, and some students felt a tutorial would have been beneficial.

## MAT 337H1S Introduction to Real Analysis

This was said to be a very useful course, with some students stating it was the most interesting 300 -level mathematics course they had ever taken.
Students commended the instructor for his enthusiasm, approachability, clarity and attentiveness to students' questions. Online notes were readily available.

## MAT 354H1F Complex Analysis I

| Learn Exp | 0 | 0 | 0 | 23 | 19 | 28 | 28 | 5.6 |

Bierstone's lectures were well-planned and well-explained, and he was described as very helpful and personable. The problem sets and midterm were considered difficult by most, but the marking was said to be very fair.
The textbook was not well-liked and many suggested another text that they felt was "superior in pedagogical value". Lectures were of tremendous value, though many students still expressed a need for tutorials. A challenging yet rewarding course.

## MAT 391H1S History of Mathematics after 1700

Gordon was well-liked by her students. She was commended for preparing clear, coherent lectures and being enthusiastic and attentive to students' questions. However, some would have preferred that she speak slower and provide a few more examples. Students greatly appreciated Gordon's availability for help outside of class hours.
The textbook was considered abominable by most, and some students expressed concerns regarding the heavy workload and the scheduling of the lectures into 3 -hour blocks of time.

## MAT 402H1S Classical Geometries

| Learn Exp | 0 | 0 | 0 | 21 | 28 | 35 | 14 | 5.4 |

Overall, Khovanskii was well-like despite an unorthodox lecturing style. He was described as "clearly inspired, and infectiously enthusiastic". A few students would have preferred more examples and better organization of chalkboard notes, but this did not detract much from the communication of concepts.
