Perpetually Seeking Advice? Praying for Some Assistance? Or are you just a Psychologically Stumped Academician? Any way you spell it, the PSA (Psychology Students' Association) is here to help! Operating from our subterranean HQ in Sidney Smith Hall, our conscientious execs & volunteers help battle the neuroticism that threatens undergraduate psych students everywhere by providing course advice, program information, and a test bank. We put on events such as Grad School seminars, "Psych & a Movie" nights, and the ever popular Wine & Cheese socials to bring out the extrovert in all psych students! Also, watch for our Psych Textbook Trade, taking place during the first week of classes in the psych lounge! Students found Urbszat to be very enthusiastic and knowledgeable. Students said the material was very interesting and relevant to everyday life, and the examples were very valuable. Students were impressed that Urbszat was able to keep 1000 students interested for 3 hours, although some complained that valuable time was spent on answering questions that were not very relevant. Some students said that 3-hour lectures were too long to pay attention to - two shorter ones would have been better. Some thought the material was heavy and the course would have benefitted from tutorials and would work better as a full year course. The tests were multiple choice and concentrated on details from the textbook. Students wished they had gotten more hints about what to concentrate on while studying. Lecture slides were helpful but not detailed enough. Despite all this, the course was a great introduction to Psychology and many students look forward to taking more Psychology courses, especially with Urbszat.

Students enjoyed the course and thought the material was interesting and relevant to real life. Dolderman was enthusiastic and very humour-

ous. He used examples from personal experience, which were extremely helpful in learning the material. Dolderman clearly outlined expectations and effectively explained difficult concepts. Some students would have appreciated the material to be presented in a more organized and timely matter, instead of rushing towards the end. The readings were very heavy for a half course. Evaluations were fair, but some students felt that they didn't fully test their knowledge.

Students enjoyed the course and found the material to be interesting. Urbszat was enthusiastic, knowledgeable, and engaging. He used excellent examples from his personal experience, and conveyed concepts clearly. Students felt that there was too much material to be covered in a half course, and multiple choice tests were not effective methods of evaluation. Some felt lectures were too long.

Difficulty	0	1	6	32	30	19	10	4.9
Learn Exp	2	2	12	45	21	11	3	4.3

Spence was enthusiastic about the material, which most students found dry - his sense of humour made the course more bearable. Most found lectures to be too long and often times unhelpful or the instructor wasted time.

Tutorials were said to be unstructured and generally unhelpful. The textbook and problem sets were said to be unhelpful for the tests, but previous tests were invaluable.

Most students felt too much time was spent covering the history of statistics and material not relevant to the tests. Most found the second test extremely hard.

Learn Exp	0	1	2	31	29	27	8	5.1

Plaks was articulate, enthusiastic, and approachable. He had good use of examples. Students enjoyed the class discussions. However, Plaks spoke too quickly sometimes. Also, Plaks used overheads that were difficult to read and unhelpful for studying. The textbook was too difficult to read, very lengthy and not concise. Also, students suggested that Plaks use more recent studies.

**PSY 230H1S Personality and Its Transformations**

Learn Exp	0	0	1	3	11	27	56	6.3

Students highly enjoyed the course and thought the material was of great value. Many students said that the course changed their perspective on the world. Peterson was very passionate and knowledgeable about the material. Most thought Peterson was an excellent instructor and very inspirational. However, some students expressed that expectations for assignments/tests were not clear enough, and feedback would have been appreciated. Also, some readings were difficult and too long.

Students found the lecturer to be very enthusiastic and helpful, spending a great deal of time answering questions in class and on blackboard. Students enjoyed Tackett's use of case studies and videos to help enrich the course. Students also felt that the textbook was dry and that readings were often too long.

Overall students thought the lectures were organized and worthwhile.

**PSY 240H1S Introduction to Abnormal Psychology**

Rector was a good instructor who was knowledgeable and enthusiastic about the material, although some commented that he could have spoken louder. The course was well-organized, although the slides were not available online. Some students found it tough to take notes both from the slides and from what was said, because Rector spoke quickly. The videos were very well-appreciated. The tests were difficult, with the second test being harder than the first. Some questions were ambiguous and others were too detailed (there were a lot of statistics). Despite any shortcomings, the course was great.

**PSY 260H1F Introduction to Learning**

Learn Exp	0	1	4	37	34	17	5	4.8

Taverna was enthusiastic and helpful and tried to make boring material more exciting and engaging. However, many students questioned the value of the peer-evaluated assignment. The slides followed too closely to the readings, and could have been posted earlier. The weighting of the assignments/tests was questionable and sometimes comments on them were vague/insufficient. The lectures were composed of good examples (video clips, guest lectures) and were interesting but too long. The material was applicable to everyday life.

**PSY 260H1S Introduction to Learning**

Many students appreciated Taverna's effort to get to know his students, despite the large class size. He was described as enthusiastic and motivating, and he appeared to genuinely care about his students.

Students enjoyed the inclusion of videos and guest lectures. However, many found lectures and slides to be a repetition of the textbook material. Some students mentioned that they would have liked feedback on their assignments and tests, especially since the tests were difficult

**PSY 270H1S Introduction to Cognitive Psychology**

Learn Exp	0	2	10	41	22	17	5	4.6

Rowe was a kind, nice and passionate instructor. Many students enjoyed the lectures. Some commented that she did not know the studies she presented in enough detail, promising to get back to the class with details.

There were no breaks for 3 hours. The slides were posted on the day of the lecture, making it difficult to print them before class. Although the lectures were interesting and the tests were fair, the marking was inconsistent. She tended to read off the slides, and some complained about the lack of critical thinking. The course expectations were well-communicated. Some students really enjoyed the course.

Anderson was described as enthusiastic and approachable. He made the otherwise dry material interesting, and students found the three hour lectures to be entertaining. The material was difficult, but Anderson gave clear examples to explain concepts.

Students enjoyed Anderson's lectures. Some found the textbook dull and difficult. The tests were also difficult and long; some questions were very detailed.

#### PSY 290H1F Physiological Psychology I

Difficulty	0	1	1	13	39	27	16	5.4
Learn Exp	1	0	4	33	14	32	12	5.1

Yeomans was very knowledgeable and enthusiastic about the material, but some students found him to be a little disorganized. The weighting of the tests could have been better by incorporating 2 midterms instead of one or having assignments/quizzes so that the final exam was not weighted as heavily. The midterm was challenging and many thought it failed to reflect fairly the students' knowledge about the material. A science background would also have been helpful. Overall, students found the course to be interesting but difficult.

#### PSY 290H1S Physiological Psychology

Learn Exp	3	0	9	33	30	12	12	4.7

Taverna was described as enthusiastic and friendly. He appeared to care about his students. Some found his lectures to be dry and very similar to the textbook material; others found his lectures to be very informative.

Students liked the inclusion of quizzes, but they did not find the peer-evaluation of assignments to be useful. The midterm and exam were perceived to be excessively detailed by some students, and they felt that the tests did not appropriately reflect the material taught.

Many students found the course enjoyable and well-organized; however, the group discussions were not very helpful. A lot of them felt that the course textbook was inadequate; it was unrelated to the lectures, boring, and had some spelling errors. The students enjoyed the videos and liked the fact that there was a proposal due prior to the final paper. A few students commented that the tests were a bit too long and that there were too many details on the experiments to memorize.

Most students commented that the instructor was very conversational and did a good job at addressing discussions and questions in class. Some students felt that the lecture could have been clearer with a central theme, whereas others felt that Farb communicated his expectations clearly. A majority of the students stated that the readings were too long, too dry, and too dense. With that being said, some suggested that the amount of reading should have been reduced and that a wiser choice of articles for a 300-level course would have been more appreciated.

The course was interesting and very valuable to every day life. Many found the course to be life-changing and some called it the best course they've ever had. Peterson was brilliant, enthusiastic and engaging. The requirements of the course were not communicated clearly at the beginning and Peterson was still deciding on assignments 3 weeks into the course. He was available after class to answer questions but never answered his email. Students really appreciated the assignments, finding them enlightening. The grading was mostly done by peers, which students disliked, believing the TA or instructor was more qualified to mark papers due to their experience. This was an outstanding course. Dolderman was affable and extremely funny, and his enthusiasm for the material was contagious. The course was interdisciplinary and integrative, providing a variety of different perspectives. The material was compelling and provocative. The course did not have a website; students would have preferred to be able to download the slides before class. The readings were sent by email, which was slightly disorganized and they were heavy and sometimes redundant, although very interesting. More details on how to write the 50% paper would have been welcomed. Despite any shortcomings, many students deemed this course and Dolderman to be the best at UoT.

## 218 PSYCHOLOGY

Students in general found a lack of communication between the instructor and TA, especially concerning course evaluation expectations. Though the lecturing itself by the instructor was good, it was difficult to fully absorb all he said as lecture slides were not posted before or after the lecture class. This prevented a more interactive setting versus the current 'copying of slides verbatim' situation. Also, the test material was thought to be poorly constructed, with errors and unclear confusing questions not clearly representing course material. Students wanted their marks for material handed in sooner. The video media material was very dated and could have been more recent to reflect more recent research.
